

The 1st edition of Agricultural Water Summit 2022, to be held on Thursday, June 16th at the Conference Center of the Sun Monticello Hotel, located in San Francisco de Mostazal, Chile.

Organized by Yentzen Group, the Agricultural Water Summit will be a meeting point not only for the agricultural industry and related entities in Chile but also for international experts, who will come together to share their experience on using innovative techniques and farm management styles to limit the impacts of drought on horticultural operations.

Fostering intersectoral cooperation through both public and private organizations in order to bring about new and meaningful responses to the water crisis is another imperative of the event.

The event is expected to receive hundreds of attendees from Chile and the rest of the world, as well as dozens of commercial exhibitors.
