

In this installment of the '[In Charts](#)' series, Cristian Crespo of [Agronometrics](#) illustrates how the U.S. market is evolving. Each week the series looks at a different horticultural commodity, focusing on a specific origin or topic visualizing the market factors that are driving change.

In this week's installment, we wanted to take a look at U.S. market prices of stonefruit - nectarines, peaches and plums - from Chile, which currently the only supplier at this time of year according to USDA data.

Nectarines

We're going to start with nectarines. Although their prices have experienced a sharp decline in prices over the last few weeks, they are currently higher than the last three seasons at the same point.

In the chart below we can see that in week 11, the average price of conventional nectarines was US\$1.57 per kilo, which is up 14% on 2018-19.

Peaches

The next stonefruit category we'll look at is peaches. After experiencing a few weeks with prices below the last season amid a decline in recent weeks, prices have recovered and are now running higher than the 2018-19 campaign.

In week 11, prices were on average US\$1.55 per kilo, which is 15% up on last year.
