

In this installment of the '[In Charts](#)' series, Cristian Crespo of [Agronometrics](#) illustrates how the U.S. market is evolving. Each week the series looks at a different horticultural commodity, focusing on a specific origin or topic visualizing the market factors that are driving change.

This week we're going to take a look at the volumes and average prices of table grapes in the U.S. market.

Mexico's season is winding down earlier than normal, and its shipments have been below last year's levels. With volumes from California's earlier region, the Coachella Valley, also down on 2019, the San Joaquin Valley will play an important role in the U.S. at the beginning of the season, which is now getting underway.

The chart below illustrates how historical volumes from Mexico have been in the U.S. market - below 2019 but still above previous years.

Looking at the San Joaquin Valley in Central California, last year's volumes were slightly below 2018 levels.

The first varieties expected to be available in the U.S. are Flame Seedless, Sugraone and Summer Royal.
