

In this installment of the 'In Charts' series, Cristian Crespo of [Agronomics](#) illustrates how the U.S. market is evolving. Each week the series looks at a different horticultural commodity, focusing on a specific origin or topic visualizing the market factors that are driving change.

With Peru's table grape season soon getting underway, we thought we would take a look at the Andean country's previous campaigns in the U.S. market and what could be in store this year.

The chart below shows how the 2019-20 season was more concentrated than previous ones, with a volume peak between weeks 3 and 5. Week 3 set a record for the highest-ever arrivals of fruit from Peru, with 21.5m kilos of grapes.

It remains to be seen how the grape season will develop in northern Peru, where it seems

growing conditions have been largely favorable, but where growers are contending with a labor shortage as a result of the Covid-19 pandemic.

In our 'In Charts' series, we work to tell some of the stories that are moving the industry. Feel free to take a look at the other articles by [clicking here](#).

You can keep track of the markets daily through Agronometrics, a data visualization tool built to help the industry make sense of the huge amounts of data that professionals need to access to make informed decisions.
